

TOMORROW'S ELKHART. STARTING TODAY.

Oakland Wastewater Storage Tank

Location

1300 Block of West Indiana Avenue

Description

New 1,400,000 gallon above-ground storage tank designed to hold stormwater and wastewater runoff during rainfall events

Schedule (subject to change)

Construction expected to start in March 2025
Completed by November 2026

Impacts

Improved water quality in the St. Joseph and Elkhart Rivers, more efficient operation of the wastewater system, and compliance with EPA

Scope of Work

11,000 square-foot, 36 foot-tall storage building with 30 foot-deep underground pump station
